

## Pure Oil of *Melaleuca alternifolia*

For first-aid needs like minor cuts, burns, wounds, abrasions, or irritated skin, choose nature's best antiseptic—pure, powerful Melaleuca Oil. Every bottle comes with our quality guarantee—assuring you penetrating, soothing relief you can trust.

Terpinen-4-ol is linked to the antibacterial properties of Melaleuca Oil. Cineole helps the oil penetrate, but in high amounts it displaces helpful germ-fighting ingredients. Only Melaleuca Oil has the perfect balance of these two compounds, a quality guarantee no other company has.

### A Natural Wonder

- Used for centuries in Australia, this high-quality natural oil helps heal minor wounds, burns, and abrasions.

### Penetrating Power

- Gentle, soothing oil provides antiseptic power that penetrates and helps clean minor wounds.

### Exclusive Promise

- Our T36-C5 and T40-C3 oils go through stringent quality checks to guarantee the perfect balance of active ingredients.

It's been called a "first-aid kit in a bottle" and The Wonder From Down Under®.

*Melaleuca Oil* is truly a wonder of nature—its unique qualities have helped generations of people relieve pain, soothe minor cuts, burns, scrapes and infections, and help their bodies heal the natural way without harsh chemicals or drugs. We provide the finest quality *T36-C5* and *T40-C3 Melaleuca Oil*—each bottle is guaranteed to have the perfect balance of natural compounds. For universal soothing power, try *T36-C5*. And at the first sign of infection, turn up the power with ultra-pure *T40-C3*. You can count on these unique, quality-checked oils for natural relief.

### A Natural Wonder

*Melaleuca Oil* is extracted from the *Melaleuca alternifolia* tree, which grows naturally in swampy regions of New South Wales, Australia. There are over 300 species of *Melaleuca* trees, but only the oil taken specifically from *Melaleuca alternifolia* has the documented therapeutic properties that make it so beneficial as a natural antiseptic. Only the best oil from the best trees is good enough to be labeled *T36-C5*. These genetically superior trees from the Bungawalbyn Valley in Australia occasionally produce an even rarer-quality oil, which becomes *T40-C3*.

### Versatile and Effective

Since the discovery of *Melaleuca Oil*, research has repeatedly documented that it can soothe and help heal even stubborn skin irritations. It provides quick relief for minor wounds, burns, abrasions, insect bites, and skin irritations. It helps kill bacteria and other microbes, helping to prevent infection and promote healing. It penetrates the skin and acts as a natural solvent to help cleanse wounds without

damaging healthy tissue. It is noncaustic and can be used full-strength on most problem areas.\*

### Exclusive Quality

There are over 100 compounds in *Melaleuca Oil* working synergistically. Some of them, like *viridiflorene*, are not known to originate in any other substance. Each compound contributes in some way to the oil's overall antiseptic and healing qualities. Two of these compounds, terpinen-4-ol and cineole, are key to the quality of *Melaleuca Oil*. Terpinen-4-ol is linked to the antiseptic properties of *Melaleuca Oil*. Cineole helps the oil penetrate, but high levels can reduce the amount of other germ-killing compounds, and may irritate sensitive skin. The International Standards Organization (ISO) has determined that oil of *Melaleuca alternifolia* must contain more than 30% terpinen-4-ol and less than 15% cineole. *Melaleuca's* standards are even higher—at least 36% terpinen-4-ol (hence the "T36") and no more than 5% cineole (represented as "C5"). These levels deliver infection-fighting power while minimizing the likelihood of irritation. *T40-C3* contains over 40% terpinen-4-ol and less than 3% cineole for ultra-pure antibacterial protection and less chance of irritation. The guarantee for quality is in the name on every bottle: *T36-C5* and *T40-C3*.

### Pure Power

When you want guaranteed quality... when you want pure, natural relief... when you want a trustworthy, all-purpose antiseptic with amazing healing and infection-fighting power, you need high-quality *T36-C5* or *T40-C3 Melaleuca Oil*.

*Keep in mind that serious injuries should always be treated by a doctor.*

**What Melaleuca Oil Can Do**  
Scientists who have studied *Melaleuca Oil* have determined it has many distinctive properties:

- Antiseptic—Kills germs to aid the healing process.
- Penetrating—Carries benefits far below top layers of skin.
- Soothing—Stops pain, stinging, and itching.
- Solvent—Dissolves residue and acts as a natural cleanser and disinfectant.
- Noncaustic—Will not harshly affect most skin types.
- Aromatic—Soothing, therapeutic aroma can be used in vaporizers.

### The Benefits of *T36-C5*:

- High-quality, all-natural oil
- At least 36% terpinen-4-ol to help kill germs
- No more than 5% cineole to ensure gentle quality
- Heals minor cuts, burns, scrapes, and other skin irritations
- Guaranteed quality in every bottle — it's in the name

### The Benefits of *T40-C3*:

- Extremely rare, high-quality oil
- More terpinen-4-ol for optimal protection, less cineole for ultra-pure quality
- Helps heal infections
- The guaranteed quality is in the name

### Dr. Penfold Studies *Melaleuca Oil*

Dr. A. R. Penfold was one of the first scientists to document the power of "oil of *Melaleuca alternifolia*." He reported:

"The result of these investigations not only exceeded expectations, but yielded results in practice far beyond anything that would have been anticipated... The germicidal efficiency of the oil... is due to the unique natural blend of its various constituents."

\* *Melaleuca Oil* can be diluted with olive oil for more sensitive areas.
