

Precious Metals

French-Milled Luxury Cleansing Bars

Turn your shower into an exhilarating escape!

Featuring an exclusive blend of natural cleansers and moisturizers, *The Gold Bar*, *The Melaleuca*

Platinum Bar, and *The Melaleuca Titanium Bar*

get your skin extra clean and super soft. Invigorating lather and eye-opening scents take

you to a whole new level of luxury—as well as get you ready for the day.

Most grocery-store soaps contain air bubbles that cost you money when they disappear down the drain. Not *Precious Metals*. All three bars are French-milled to eliminate air bubbles so they last longer—in fact, up to three times longer than ordinary soap.

A Natural, Luxurious Clean

- All *Precious Metals Bars* feature pure Melaleuca Oil to promote clean, invigorated, moisturized skin.

Rich, Moisturizing Lather

- Each bar includes a fast-acting ingredient for a rich, creamy lather that leaves skin feeling soft and conditioned.

Fabulous Scents

- The *Precious Metals Bars* invigorate with a light citrus scent, pamper with a sweet apricot scent, or refresh with a clean, sporty scent.

Take time out to relish the clean, refreshing, moisturizing bathing experience of *Precious Metals*. Unlike grocery store bar soaps that stop at regular cleansing, these superior soaps provide a luxurious retreat from the ordinary—while moisturizing and promoting healthy looking, invigorated skin. *The Gold Bar*, *The Melaleuca Platinum Bar*, and *The Melaleuca Titanium Bar* go beyond traditional bar soaps—delivering exceptional cleansing and skin-softening benefits, a rich, foamy lather, and three extraordinary scents. Once you experience any one of these exceptional soaps, you'll never use ordinary soap again!

A Natural, Luxurious Clean

Some people believe that in order to get their skin really clean, they need to use a harsh or synthetic cleansing soap. But with powerful, science-recommended cleansing ingredients and nature's own Melaleuca Oil, the *Precious Metals Bars* deliver a superior clean, while being extra gentle to your skin.

The exclusive 3-in-1 moisturizing complex (composed of Melaleuca Oil, glycerin, and aloe vera) softens skin, knocks out odor, and protects against moisture loss while you bathe. In other words, you get the great clean of a deodorant soap and the softness of a moisturizing soap, packed in one luxurious bar.

Rich Moisturizing Lather

For more lathering power look no further than the *Precious Metals Bars*. They all include a fast-lathering ingredient that not only delivers a generous lather every time, but leaves skin feeling soft and smooth. Just a few quick turns in your hands and you'll have more lather than you ever did with grocery store soaps.

Fabulous Scents

You'll love waking up in the morning or relaxing at night with the citrus, apricot, or sporty scent of the *Precious Metals* collection. All three scents are refreshing and exhilarating—providing the perfect escape into

luxury. And they're scents your whole family will love. Experience the difference. Experience *Precious Metals*.

The Benefits of Precious Metals

- Provide a luxurious escape
- Clean with the natural properties of Melaleuca Oil
- Include a revolutionary 3-in-1 moisturizing complex
- Lather generously
- Choice of three scents
- Last multiple times longer than ordinary soap
- Packaged in regal metallic foil to protect the soap

Precious Metals: Three Times the Luxury

Most grocery-store soaps are made in centrifuges—machines that use a spinning action to process the material. This is a far cry from the French milling that creates our *Precious Metals* soaps. During this process, the finest proprietary ingredients are compacted through temperature-controlled, pressurized steel rolls. Each successive passage mills the material into a harder, denser, more concentrated mass of luxury ingredients, thanks to the immense pressure exerted by the rolls. Time after time—three times, in fact—the material is pressed through, and the air is forced from the mixture. Finally, the exact consistency is achieved and the rich, dense material is ready to be given its final shape and design. The result? A truly longer-lasting cleansing bar for your shower.

Ingredients:

MELALEUCA OIL

Function:

- Antibacterial properties gently clean away dirt and odor without causing dryness or irritation
- Special moisturizing properties help soften and care for skin

GLYCERIN

- Keeps skin soft and moist to prevent against dryness
- Humectant which, through its hygroscopic action, helps keep moisture in the skin

ALOE VERA

- Moisturizes, hydrates and stimulates syntheses of collagen and elastin fibers that can cause wrinkling of the skin

Raising the Bar on Soap!

Experience the Exclusive 3-in-1 Moisturizing Complex

Unlike many traditional soaps, the *Precious Metals Bars* are not simply gentle to your skin. Rather, they feature an exclusive 3-in-1 moisturizing complex—Melaleuca Oil, glycerin, and aloe vera—to promote soft, moisturized, younger-looking skin.
